

We Will Turn You Into a Windows Security Expert By Sharing Our Expertise & The Most Up-To-Date Tools (And a Few Geeky Jokes, too) 000

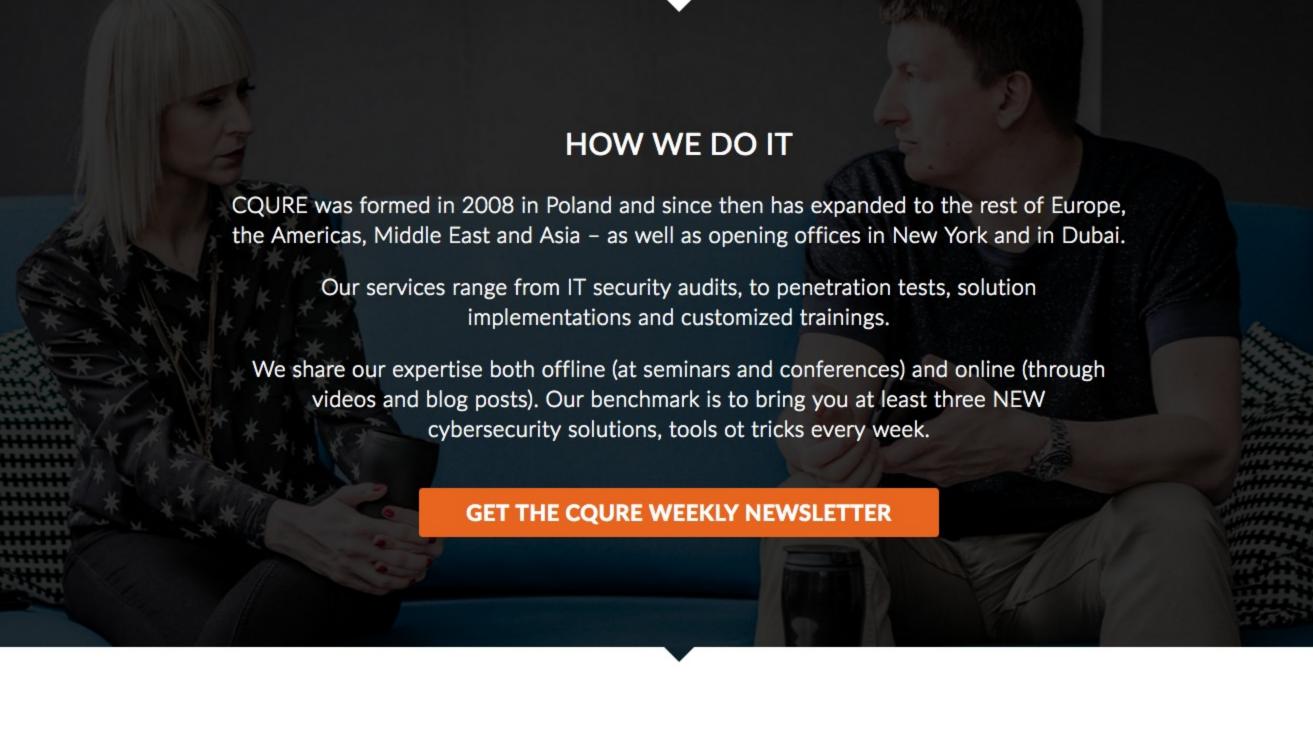

According to the industry's statistics, by 2019 the market will need 6 mln security professionals... but only 4 to 5 million of them will have the needed qualifications.

That means we'll be short of 1 million IT soldiers. (Let that sinks in for a moment.) We want to fix this — and we need YOU.

What excites us the most is sharing what we know with other IT experts.

Especially if they are already skilled and want to seriously level up their game.

you might have seen us in quite few places by now.
